- Lightweight titanium handle reduces hand fatigue while providing lasting durability.
- Squeeze style handle provides extremely smooth actuation for high precision surgical manoeuver.
- Rounded grip area enables easy 360° rotation during use for optimal positioning of tip. Forceps and scissors have stationary distal tips to eliminate any unintended movement of the jaws during actuation.
- A wide variety of instrument tips are available to meet every surgical need. Tips are made from stainless steel which is highly corrosion resistant, resulting in smoother operation and fewer repairs.
